

GET GOGO INFLIGHT ENTERTAINMENT

One **FREE** Year Subscription With Your Gogo L5 Installation At Duncan Aviation

Inflight connectivity helps passengers stay productive and engaged. A truly great connectivity experience relies on more than reliable high-speed networks and expertly installed data systems. It requires applicable services and subscriptions that turn the capability of connectivity into practical and productive activities.

To ensure the best connectivity experience for business aircraft operators who have Duncan Aviation schedule and install the Gogo Business Aviation AVANCE™ L5 internet and Wi-Fi system, **Duncan Aviation is extending the FREE of charge period for Gogo Text & Talk and Gogo Vision inflight entertainment to ONE FULL YEAR.**

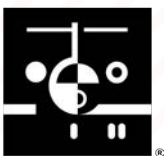

This limited-time offer allows operators to install the Gogo AVANCE L5 hardware that connects to the Gogo Biz 4G network, delivering faster speeds and enhanced network capacity. It then gives them 12 months of unlimited access to Gogo Text and Talk and Gogo Vision subscription services. Gogo Text & Talk lets an aircraft's crew and passengers use their personal smartphones and devices to call and text in the air just like they do on the ground. Gogo Vision lets passengers enjoy blockbuster movies, hit television shows, popular magazines, flight maps and more on their own devices during flight.

This is a top-tier package that gives operators a proven connectivity solution installed by the most experienced system installers.

Duncan Aviation has seven STC solutions for the L5 system that cover the Wi-Fi certification and full equipment and antenna installation required to provide in-flight connectivity to the Gogo Biz® 4G network. These STCs are available for a growing list of aircraft makes/models including the following:

- Citation 680 and 750
- Global Express, XRS, 6000, and 5000
- Challenger CL-650, CL-605, CL-604, CL-601-3A CL-601-3R, 300, and 350
- Gulfstream GIV, GIV-X, G300, G350, G400, and G450
- Falcon 900 and 900EX (EX, EASy, LX, DX)
- Falcon 2000 and 2000EX (EX, EASy, LX, DX, LXS, S)

**DUNCAN
AVIATION**

The Duncan Aviation STCs have been used for more than 180 installations of the Gogo AVANCE L5 Wi-Fi system. The company has installed more than 1,000 Gogo connectivity systems over the years, has been named Gogo's Top Dealer every year since 2011, and is Gogo's exclusive AOG service partner.
