

Core Aircraft List

Change - Limited Airframe Ratings were removed from BTL, LNK & PVU Op Specs. This internal "Core Aircraft List" replaces those limited ratings (RSGOM PP-02-01 & RS-05-01).

***Special Projects** not on the Core Aircraft List may still be possible under a Class 1, 3 or 4 rating if a QF100 eval shows we have training, facilities, tooling and tech data.

International Projects - Please review the Op Specs for each country. **Satellites** - Models over 12,500 not listed on Capability List need a QF100 added to the Quality Satellite intranet page.

*Class 1&3 aircraft that weigh 12,500 lbs MGTOW or less per the TCDS do not require a QF100 for minor maintenance and preventive maintenance. For inspections and larger work scopes in Class 1&3 (removal, disassembly and installation of powerplants, propellers, primary flight controls & landing gear) a QF100 is required. Aircraft managed by Duncan Flight Operations do not need a QF100.
